03 SUMMARY OF ALLEGED OR POTENTIAL PROBLEMS (Provide narrative description; enter up to 5 lines of text)							
Since 1968, the George H. Fallon Federal Office Building's 107,040-square feet facility includes approximately 2.4-acres and 819,150-square feet enclosed space. The Site is bound to the east/ north by the Charles Center High-rise office building, and the Morris A. Mechanic Theater. The Site is developed as a professional office complex. The January 1998 Hazardous Waste Compliance Docket listing of the George H. Fallon Federal Office Building is the result of RCRA 3010 notification (manifest errors/ inconsistencies during the asbestos investigation/ abatement). The RCRA 3010 notification went to EPA Headquarters and thus EPA Headquarters placed it on the January 1998 Hazardous Waste Compliance Docket list.							
General Service Administration (owner) and EPA will coordinate the assessment of the past release to groundwater, surface water, and soil. N/A
